FEATURES with BENEFITS

Emissions

- The V1505 naturally aspirated engine complies with EPA Interim Tier 4 emissions regulations that are effective through the end of 2012. This engine also complies with EU Stage 3A requirements that are effective through 2012 and beyond in the European market.

Durable Power

- The Kubota 05- Series is an established leader in its horsepower range and has been the preferred power source of various industrial equipment manufacturers.
- The V1505 NA engine offers a seamless transition from Tier 2 to Interim Tier 4 by maintaining the same footprint and hardware mounting points with only slight performance changes from the Tier 2 engine.

Clean and Quiet Power

- Kubota's original E-TVCS (Three Vortex Combustion System) has been improved. The airflow, combustion chamber and piston recess were optimized to provide a 50% lower particulate matter (PM) level, the same stringent level as above the 37kW-class (EPA Interim Tier 4).
